BWP100
WATER BASED
EPOXY MEMBRANE

Water resistant, prevents rising damp, efflorescence and withstands hydrostatic pressure.

Excellent adhesion to most substrates including damp surfaces and freshly laid concrete

Application:
Indoor and outdoor substrates

Mixing ratio:
Component A and B are mixed at the ratio of 1:1 by volume

Coverage:
20L mixed will cover 30m² in 2 complete coats, ie: 1.5m²/L

Drying time:
Full cure in 7 days, sufficiently cured in 12-24 hours

Packing Standard:
10 Litre
